

Fundamental Skills in IS Auditing

13&14 Nov 08 (Singapore), 9am to 5pm

As more and more businesses turn to Information Technology to enhance productivity and improve competitiveness, Auditors also need to keep pace with this trend. As electronic records and electronic processes replace paper records and manual processes, Auditors must still be able to give opinions, evaluate and investigate these new Electronic processes with the same level of confidence as before.

A thorough and sound knowledge and understanding of how electronic processes perform their tasks in the business environments of their entities becomes crucial. Otherwise the risks to the Auditors in himself are enormous - he concludes everything is fine when it actually is not. And he is not able to investigate incidents as confidently or competently as before and thus exposes his own vulnerability and that of the entity in dealing with this technology.

This program gives auditors new to this field, a sound and fundamental understanding of how these electronic environment and processes should be approached. On Completion of this program participants should be able to carry out a fair amount of basic IS Audit work competently and confidently.

Course syllabus

Day One

- Introduction to IS auditing
- The basic concepts and objectives
- The “how to start, where to start & what to do first”

• Speaker's Profile

SURESH DHARAMDAS, CA (M), FCCA, CMIIA, Adjunct Professor UUM

Professionally he is an FCCA, CMIIA, CA (M), and adjunct Professor with Universiti Utara Malaysia in the school of Accounting, specializing in Forensics and IS Audit.

He has more than 30 years of working experience, in a wide range of industries, from Audit and Receivership, to American and German MNCs. He has been involved in the oil and gas, construction, manufacturing, trading, hospitality and music industries. Career work scope has ranged from initially being an accountant/auditor to financial controller to financial director and Company Secretary. Work involved has ranged from system and process creation to automation implementation and process overhauls, to network monitoring and fraud detection, from external audit to internal audit to investigative and forensic work.

He is a regular speaker for the local audit and accounting professional community. He has trained the Accountant General's Office internal audit staff, the Securities Commission's auditors, and various listed entities such as Sime Darby and MISC in the fields of IS Audit and Forensic methodology. He has special knack for demystifying complex and technical concepts and terminology into ordinary things, which his audience can relate to immediately. His lectures are always very pro-active and designed to give you skills you can use almost immediately when you return back to your organizations. There are always a lot of cases to be worked out and presented in class to reinforce the theoretical concepts. You get a hands-on approach to the training.

Presently CEO of Crimson Corporate Mgmt Sdn Bhd, a specialist entity that provides forensic and financial intelligence services and corporate rescue services. He is also a director/shareholder in an International School and Company Secretary to selected clients
